PROJECTS & CASE STUDIES

1. SusWord - Real-time Multiplayer Social Deduction Game

- Built with React, Node.js, and Socket.IO for real-time lobby state syncing & voting physics.
- Focus: User interaction psychology, game loops, connection buffering, and real-time state management.

2. HabitMetric - Forgivable Productivity Habit Tracker

- Built with React & Tailwind CSS. Focuses on rhythm averages rather than punishing perfect streaks.
- Focus: Behavioral UX design, persistent local caching, and custom analytics visualization.

3. Accredian Orbit - Unified Student Learning Ecosystem Planning

- Deconstructed student learning workflows to map low-fidelity wireframes, user onboarding flows, segmentation models, and core dashboard tradeoffs for a unified learning platform.
- Focus: Systems thinking, user friction deconstruction, and structured product wireframing.
