PROFESSIONAL SUMMARY

Computer Science student passionate about product management, user research, and business strategy. Currently interning at a US-based startup, gaining hands-on experience in operations, SOP documentation, customer workflows, and cross-functional execution while building product case studies and web projects.

SKILLS

Product Skills

- Product Management
- Product Teardowns
- User Research
- Competitive Analysis
- User Stories
- PRD Writing
- Product Strategy

Technical Skills

- Notion
- Figma
- Jira
- Wireframing & User Flows
- HTML, CSS, JavaScript
- React (Working Knowledge)
- Git & GitHub
- REST APIs
- AI-Assisted Workflows

Core Skills

- Analytical Thinking
- Problem Solving
- Strategic Thinking
- Creative Problem Solving

EXPERIENCE

EASTTEAM (US-based Startup) — Operations & Executive Assistant Intern | Jul 2026 – Present

- Supporting customer operations, SOP documentation, AI-assisted email workflows, onboarding, and cross-functional collaboration.
- Using Notion, Slack, Claude AI, and internal tools while documenting processes and improving operational consistency.

PROJECTS

SusWord — Real-Time Multiplayer Social Deduction Game | React · TypeScript · Socket.IO · Node.js

- Owned full product lifecycle: defined game mechanics PRD, designed a 5-phase state machine (lobby → word assign → discussion → vote → result), and shipped a live multiplayer product for 3–8 players.
- Identified core engagement drop-off between rounds and designed imposter role mechanics to sustain tension and improve session retention.
- Wrote Socket.IO event model, backend schema, and phased implementation roadmap across 4 milestones.

HabitMetric — Productivity & Habit Management Platform | React · JavaScript · Tailwind CSS

- Defined product requirements around habit recurrence, streak tracking, and progress visualization — translating user pain points into a prioritized feature set with a zero-login UX.
- Designed a persistent browser-storage workflow to reduce repetitive task entry and simplify daily planning through a clean, intuitive interface.

PM Portfolio Website & Blog | React · TypeScript · Framer Motion · Three.js · AI-assisted development.

- Published structured product teardowns of Duolingo, Blinkit, Spotify, and Airbnb, analyzing user journeys, product strategy, monetization, UX decisions, marketplace dynamics, and improvement hypotheses supported by measurable success metrics.
- Designed a 30-60-90 day growth strategy for a Founder's Office internship assignment, proposing user segmentation, acquisition channels, growth experiments, KPIs, and scaling recommendations for a domain-based digital identity platform.

PRODUCT THINKING & RESEARCH

Product Teardown Lab (Ongoing) — productandperspective.blogspot.com

- Analyze products using a structured framework covering user problems, product decisions, business impact, North Star metrics, competitor analysis, and improvement opportunities.
- Publish detailed product teardowns featuring first impressions, user journey analysis, feature mechanics, business impact, competitor comparisons, and data-backed improvement hypotheses.

EDUCATION

Ajay Kumar Garg Engineering College (AKGEC) — B.Tech Computer Science | Expected 2027 | CGPA: 8.24 / 10

Class 12 (CISCE): 80.40% | Class 10 (ICSE): 82.70%
